-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-10 and 14-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 669,365 taken in view of Schmidt et al. US 6,019,831.

4. The rationale advanced in previous office actions with respect to the patentability of the claims relative to EP 669,365 is maintained. It is agreed that this reference fails to show the claimed species of silicate. The question is, and has been, would it have been prima facie obvious to one of ordinary skill in the art to use the claimed species of silicate in the polypropylene film applications as shown in EP 669,365. The examiner maintains that "yes" is the answer to that question. The US patent issued to Schmidt is supplied as further evidence of the obviousness to select the claimed silicate.

5. The Schmidt patent shows dry ground silicate, column 3. This silicate is further described as being non-glossy, irregularly shaped, layered and having a rough surface, column 2 lines 51+. This patent also describes the use in laser marking plastic applications, column 11, lines 66 and 67. It is acknowledged that this patent teaches the optional coating of the silicate with a metal oxide. This coating is not mandatory and organic coatings are used in making the layered silicate, see column 4, lines 24-25. It would be obvious to use the layered silicate of this patent in the applications disclosed in the EP document.
